

Making Five

by Vicente S. Maglalang

See! these jolly little men
 For making five are here again.
 Teach us how to make five, quick!
 While each listens in his seat.
 3 and 2, we learn, are 5,
 Just as sure as I'm alive.
 5 is made with 4 and 1;
 To learn to add—Oh, my! such fun!
 5 and 0 are 5 you see;
 That's as plain as plain can be.
 Now there are no more to learn:
 Scamper off, you little men.

$$3+2=5$$

$$4+1=5$$

$$5+0=5$$
