HOOVER SAYS RUSS OBSTRUCT PEACE TO SPREAD RED RULE.

SALT LAKE CITY, Aug. 12—Herbert Hoover, the only living ex-President of the United States, bluntly appraised the world situation and the policies of the United States in his address, declaring that, "there is today universal desire for peace, except Russia."

"My impression is that Russia is obstructing to gain time for elimination of all non-Communists elements, and thus for the consolidation and practical absorption of those areas behind the 'iron curtain' and Manchuria," he said.

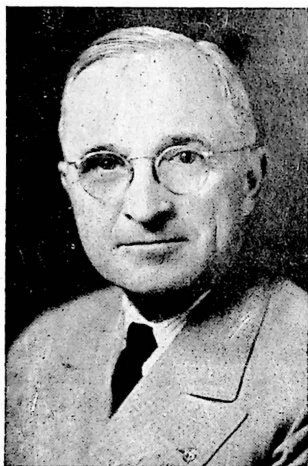

He accused Russia for "Invigorating her fifth column in every country." The result—the rest of the world concentrates its fears and animosity toward Russia.

Ex-President Hoover commented that to reduce the German people to a "level of perpetual poverty will someday break into another world explosion."

He further warned that due to the destruction and deterioration of the world's productive equipment and including the United States who suffered depletion of reserves and equipment, adding we are burdened with fabulous debt and are slow in recovery of production, he suggested three major policies for the United States, he said:

1. Our resources must be conserved, ending our rôle of Santa Claus, now that the world famine number two is about over.

2. In national defense we should hold the atomic bomb until there is real cooperation for lasting peace.

HARRY S. TRUMAN

President of the United States

"On behalf of the United States of America, I do hereby recognize the independence of the Philippines as a separate and self-governing nation and acknowledge the authority and control over the same of the government instituted by the people thereof under the constitution now in force."

3. The United States must devote itself to cooperation in the United Nations to maintain peace and cease appeasements. The Atlantic Charter must be asserted at all times.

THE ATOMIC BOMB

The world today is suffering from atomic psychosis. They are all afraid of the bomb, for it is the most horrible weapon of war ever invented by men. If it is used for warfare it will certainly wipe out and bury civilization in the dust.

The fundamental issue before the world today is who will take care of this weapon. Will the United Nations Organization handle it or the United States who invented it.

Some powers are still hungry for a bigger place—known as the sphere of influence where they can plant their economic and political philosophies. It is the geopolitic that is ahead of the strategy.

The Paris peace conference indicates that the United Nations is not strong enough to cope with the situation as custodian of this destructive weapon. This should be in the hands of a nation that will use it for the best interest of all loving peoples of the earth. With this matter in view the course that the United States and the peace loving peoples of the earth should take, is to keep the atomic bomb and its secret until there is a guarantee for international peace and security throughout the world.

WHAT CHURCH MEN SAY

President Truman—*"Unless the church forces provide the spiritual awakening in this atomic age, we are headed for the disaster we would deserve."*

Martin Dies—*"A revival of Christian faith, Christian living, and Christian teaching in America can alone avert the tragedy of other democracies of the world. That revival cannot come from the politicians, school, store or other agencies. It must come under the leadership of the church. There can never be a compromise between Karl Marx and Jesus Christ."*

Rev. Dr. L. E. Olsen—*"A spiritual revival is necessary to deliver America from its present static activism to a quality of spiritual power, whereby we can make Christ and His gospel contagious to the whole world."*

J. Edgar Hoover of the F.B.I.—*"Too few of the youth of America are being reached by the churches, and this failure to make contact with the citizens of tomorrow is producing a fertile field for future crime, I sincerely believe that if America is to remain devoted to the fundamentals of Christian living, more adults must assume their responsibility in bringing our young people closer to the church."*

General Douglas MacArthur — *"The problem basically is theological and involves a spiritual recrudescence and improvement of character—it must be of the spirit—if we are to save the flesh."*

James L. Leitch, D.D.—*"The minister is the key to church attendance. That this is true goes almost without proving. He is the 'key' because his congregation looks to him for leadership. They have chosen him as their leader and they have solemnly pledged to follow and uphold him."*

EHRENBURG EXPECTS GREAT U. S. CULTURE

LONDON, July 18—Ilya Ehenburg, Russian journalist, declared today in a radio broadcast article that the United States' spiritual culture is only, "just beginning." He said it would become greater and independent.

The Moscow radio broadcast attributed the spiritual culture of America's development to Franklin D. Roosevelt.

"Thoughtful people capable of estimating the progress of history rallied around Roosevelt," he wrote, "even if they have been removed or have resigned, the late president's activities have not disappeared without a trace . . . An American intelligentsia has arisen . . ."

"But among the intelligentsia one finds more and more good people, who understand that salvation does not lie in running away or isolation but in raising the spiritual level of the average American to the technical civilization which accompanies from the maternity home to the crematorium."

THE CHURCHES MUST WORK FOR PEACE

CAMBRIDGE, England, Aug. 5—Dr. Frederick Nolde, dean of Mount Airy Theological Seminary graduate school addressed the World Council of Churches an organization of Protestant and Orthodox religious groups in a conference at Cambridge, urged that churches "sell" the Christian principles to international politics. He further urged that leaders of the churches the world over "go to the limit in applying all possible contacts," to bend the word's political leaders toward Christian solutions of the world's problems.

REBEL PHILIPPINOS

ARRESTED

MANILA, Sept. 2—The Philippine government began wholesale arrests of rebellious peasant leaders today and opened up with artillery against their followers defying its edict to disarm.

The fighting is taking place on a mountain 50 miles north of Manila. Newspaper correspondents are not allowed to give any reports from this new and untried republic.

Previously, President Roxas had spoken that the uprising of the peasants in central Luzon is "economic, rather than social or political." The government is giving careful study of the problems where the demands of the peasants will be considered. Only the threat to overthrow the government will be subdued.

The Huks were given ample time to prepare and surrender their arms to the Philippine army the last day of August and after that date the government will strike with the "implicable force," President Roxas warned he would use.

INTER-COMMUNITY ORGANIZATIONS PRESIDENT URGES PASSAGE OF PROP. 11

LOS ANGELES, Sept. 5—Antonio A. Gonzales, president of the Filipino Inter-Community Organizations of the Western States, today appealed for full support of the California Fair Employment Practices Act, on the November ballot as Proposition No. 11.

The FEPC Act would make it illegal for employers and unions to discriminate against members of minority groups because of race, creed or color. It sets up a five-man commission which would investigate discrimination in hiring and order discriminatory practices stopped.

"No decent man or woman can oppose the Fair Employment Practices Act," Gonzales said. "Only bigots and enemies of American democracy can oppose legislation which would only give all men their constitutional rights to earn a living regardless of race, creed or color.

"The FEPC Act is eminently fair and just legislation. It will be an economic advantage to employers as well as to workers.

"I urge all those who believe in American democracy to work for the passage of the Fair Employment Practices Act, on the November 5th ballot as Proposition No. 11."

Information concerning the Act, and information on how it can be helped, can be obtained at San Francisco headquarters, 216 Market Street, or at 541 S. Spring Street, Room 911, Los Angeles, from the California Committee for Fair Employment Practices.

Frank N. Belgrano, financial adviser to the Philippine commissioner, Paul V. McNutt, who just recently arrived in San Francisco after spending nine months in the Philippines, said that "the Philippines are bankrupt." Mr. Belgrano is vice president of the Bank of America.

"Only with our financial help can they be restored to post war economy," he said. It will take from three to five years to get them back on their feet, but it is beneficial for the United States to see that they do," Belgrano said.

Belgrano arrived aboard the Matsonia with his two daughters, Carlo and Evelyn.

SAN FRANCISCO JUDGE ASSAILS FILTH BOOKS

Strong criticism was voiced in San Francisco yesterday against the sale of filthy books and obscene literature. Superior Judge Melvyn I. Cronin stated that, "every reasonable move should be made to keep the filth away from general circulation. Such salacious literature tends to benumb the mind and dull our moral restraint."

"Self respecting and decent people will cooperate in halting the sale of filthy books, I am sure, even though sophomoric and cynical 'freewheelers' will shout that their freedom to wallow in swill is being interfered with," he said.

Police Chief Charles Dullea also joined in the criticism of salacious literature flooding the nation's book stores.

"It has been the experience of the police department," he said, "that these books definitely contribute to juvenile delinquency." The police are on the alert at all times to suppress their sale.

"Juvenile delinquency is one of the city's major police problems. Anything that contributes to such delinquency must and will be curbed."

KEEP THE PHILIPPINES STRONG

One way to keep the Philippines strong is the idea of introducing modern industries. The Philippine capitalists should take this matter seriously, otherwise the Philippines is a helpless country when the world crisis comes.

The building of light and heavy industries should be the business of the people. In this way the Philippines will be a modern country in the Orient, perhaps one of the most modern in the world in the next 25 years.

The Filipinos abroad can help their motherland by saving their money. They can form business corporations and transfer the capital to the Philippines.

The next thing the island should be thinking and planning is the defense of the country. The Philippines had a great lesson in this war. She was unprepared. This is the time for national defense. America and the Philippines should be prepared on the defense of the Pacific.

THE PHILIPPINES BEGINS RATIONING OF RICE

MANILA, Aug. 1—Rice rationing in the Philippines went into effect today, as a result of the heavy crop losses in central Luzon caused by peasant uprising. There will be some hardships in central Luzon this winter as the rice destroyed is estimated at 19,000,000 sacks, but other provinces in the Visayans and the Mindanao section will upset the losses as the report indicates that heavy crops are expected in those areas. The shortage of work animals, killed during the war, contributed to the economic dislocations.

PEACE "IMPOSSIBLE" IN CHINA

NANKING, Aug. 11—General Marshall and Dr. John Leighton Stuart, American ambassador, pointed out in an unprecedented statement that peace appeared "impossible", because the government and the communists disagreed on the fundamental issues of the makeup of the local regimes.

General Marshall is the personal envoy of the President of the United States and Dr. Stuart is a missionary in China. Both General Marshall and Dr. Stuart are putting up a restraining influence in preventing a civil war. In the last few weeks the effectiveness of their influence was lost . . . for both sides are attacking.
