

If I were the judge I would have taken the fol-lowing course of action in order to render a proper decision on the now raging controversy of temporary policemen in the Province of Camarines Sur:

Policemen: Good Morning, Mr. Judge. We came to file an injunction against the new Mayor of our town for having arbitrarily dismissed us from service. We served as Chief of Police and policemen of our town from January, 1963.

Judge: Why do you say arbitrarily? Are you or is there anyone of you who possesses civil service eligibility?

Policemen: No sir. All of us served in a temporary capacity.

Judge: The ground by which you maybe justified legally to file injunction against the new Mayor of your town is to prove before me that you have offic-ial personality as such Chief of Police and policemen. Now do you have with you your appointments as such Chief of Police and policemen?

Policemen: Yes, your honor. We have here our individual appointments.

individual appointments. Judge: But these appointments of yours are dated January, 1963. In order to justify yourselves in your efforts to seek justice your appointments for this year are necessary because the law says that appointments for temporary employees without civil service eligibility must be renewed every six months that is, you should have new appointments dated July I and January I of each year. In the absence of these appointments government disbursing officers are inhibited by law to pay you your emoluments. Without renewed appointments your terms as such Chief of Police and policemen have ceased. Therefore my court has no jurisdiction over the cave of in-junction which you intend to file against the new Mayor of your town. Your last recourse is to submit your case to the Polcom which has complete jurisdict-ion over police organizations. So ordered

So ordered.

Dechavez Wins Corsogon Hotel and Restaurant Management Seminar First Marathon Race

FIISI MAIGINON KACE SORSOGON, Sorsogon, May 13, — Fourteen contestants par-ticipated in the first marathon race held in Sorsogon on May 11, 1968 to usher in the 1968 Summer Athletic League. Dulcesimo Dechaves won the nine kilometers race in 31 mi-nutes while Benjamin Jetajobe was a close second with a time of 31.5 minutes. The others who finished the four-lap race were Romeo Dio, Domingo Dichoso, Jaime Celes-tra, Edgar Ocera, Francusco Bal-balosa, Ernesto Jeresano, and Ferdinand Casuela.

utes while Benjamin Jetajobe as a close second with a time f 31,5 minutes. The others who finished the ur-lap race were Romeo Dio, a, Edgar Ocera, Francisco Bal-losa, Ernesto Jeresano, and rdinand Casuela. The marathon race was held under the auspices of the Sorso-gon Athletic Coordinating Coun-cil. Prizes awarded to the win-ners were as follows: First-P20; second-P15; third-P10 and fourth-P5. The rest got consolation prizes. Dra. Cecilia A. Ortiz, wife of the governor, distributed the pri-zes to the winners, -JDD

Trawl Operators

SORSOGON, Sorsogon, May 15 -- Fishermen around Sorso-gon Bay and Magallanes waters urged today congressional action to put a total halt on trawl ope-ration in this area.

The issue of trawl boats operating in Sorsogon marine waters took a new twist with the report that some of the vessels operating are manned by Japanese.

Mayor Manuel Carranza of Magallanes disclosed that some Japanese trawl boats were seen poaching in the territorial waters of that municipality. municipality.

Earlier, he told local reporters that some of the Filipino-owned trawl boats operating in these waters are heavily armed making it difficult for local law enforce-ment agents to undertake pursuit.

Many sustenance fishermen li-ving in the municipalities bor-dering the 50 square miles Sor-sogon Bay have been complaining against the operation of these trawls as they claimed that it de-prived them of their main source of livehood.

According to them, trawls do not only destroy the spawning grounds of several important commercial fishes but also catch spawners. Sorsogon Bay is the spawning grounds of such com-mercial species as crabs mercial species as crabs, slip-mouth, kandule and shrimps.

The problem of trawl opera-tion in these waters has plagued previous administration to the extent that an appeal was made to Malacanang for a total ban on this form of fishing in Sor-sogon Bay and Magallanes wa-ters. However, no ban has been issued. But local fishery person-nel pointed out that there is a law regulating trawl operation in waters seven fathorns (42 fect) in deep. Unless said law is am-ended or a new law specifically prohibiting trawl operation in lo-cal waters, the executive departcal waters, the executive depart-ment cannot issue any ban, according to them.

A Food Miracle

MANILA, THE PHILIP-PINES. — While the United States seeks to settle the future of the Far East on the battle-field, the Filipinos have develop-ed a more lasting solution in the rice paddy. They have pro-duced an agricultural revolution which may have a better chance than armies of overcoming the Communist revolution. They are sending their Asian neighbors not bultes but rice — a revolu-tionarv new rice which promise to fill the empty bowls and bel-lies that are, to a large extent, responsible for the great discon-tent that grips these lands. — The dramatic decision to dis-tribute the experimental rice to Filipino farmers, risking a dis-satrous crop failure if the deve-lopers were wrong, was made by the Philippines President Ferdi-nand Marcos. PARADE was in-vited to sample the new food at a private luncheon at Malaca-nang, the presidential palace. His beautiful wife, Imelda, who acame to Washineton, dished out

a private luncheon at Malaca-nang, the presidential palace. His beautiful wife, Imelda, who dazzled Americans when she came to Washington, dished out the rice as if it were caviar. They talked with enthusiasm about the crop that they believe will change the course of Asian life and bring new affluence to people to have suffered for cen-turies from hunger and over-po-pulation. "We are only a small country," said President Marcos, "but we can help feed the world. If other countries plant

the rice as we have, the Philip-pines will have helped to elimi-nate starvation in a part of the world where millions of people known nothing else."

-1

known nothing else." The development of the "mi-racle rice," as it is called by the farmers who have planted it, un-questionably is a major contribu-tion to civil zation. Besides the promise of sufficient food for the world's most underfed peo-le it offers a way to improve ple, it offers a way to improve the whole social spectrum for the underdeveloped nations.

the underdeveloped nations. The new rice, known officially as IR 8, was born at the Inter-national Rice Research Institute at Los Baños in southern Lu-zon. The institute, staffed with an international group of scien-tists and agricultural experts, is financed by grants from the Rockefeller and Ford founda-tions. IR 8 is a hybrid rice, the result of a cross between a short, tough Chinese plant and a tall, delicate strain known for its ability to produce a heavy with its ability to produce a heavy crop with proper fertilization.

A New Rice is Needed

A new main plant has been able to meet the needs of farm-ers in the lands where rice is the main course at every table. able to meet the needs of rarm-ers in the lands where rice is the main course at every table. The delicate variety -Peta - has a six-foot-high stem that is high-ly vulnerable to storms. The wind and the rain bend it in half, and drop its heavy head into the water. The small Chi-nese plant withstands the last of weather, but produces little rice. The researchers at Los Banos, remembering how crosspollination gave America corn that filled the nation's grain bins to overflow-ing, did the same thing with the rice plants. The results have been equally spectacular. The IR 8 hybrid is short and tough like its Chinese father, but pro-duces rice like its Peta mother. It took the International

Bill For CityHood of Iriga Hurdles Senate By Philip I. Garay

House Bill No. 7270- an Act an official of the province of conventing the municipality of Chararnes Sur is hell-bent on Iriga into a city successfully pas-sed the Senate on third reading resort to a tast-ditch lobby at last May 16, 1963, without Malacañang. Amendments. This was made accelible learch

This was made possible largely by Senate Almendras who spon-sored the bill in the upper cham-ber and also with the able sup-port of Sen. Aytona and Sen. Ziga. The bill as passed by the upper house screen for some Ziga. The bill as passed by the upper house, except for some minor changes in phrascology, was practically the same and all major provisions remained intact. As things now stand, the presidential approval. It is the presidential approval. It is the presidential approval. It is the bill in a week or two. There is however a disturbing report unconfirmed though, that dismay in congress? To oppose a thing for a noble and justifiable cause deserves and justifiable cause deserves to consistenly oppose something for obviously political and perso-mation of sheer rascality and irresponsibility. The proper perspective then in this connection, should be magnanimity in defeat and humbleness in vistory.

resort to a last-ditch lobby at Malacañang. The crucial query now is, will this official succeed in thwarting the aspirations of Irlga to be a metropolis, or shall this same official again receive a stinging rebute as he found out to his dismay in congress? To opnose a thing for a puble

vacationist because of the good beaches and beautiful scenery. E-ventually, this road will serve as the main northern access route to the planned Bicol West Coast Highway.

world

'I felt sure it would work.

"I felt sure it would work. Still, it was a gamble when I ordered our farmers to plant it." President Marcos' gamble has brought the larmers unexpected dividends. IR 8 ripens in four months a full month faster than standard varieties of rice – and it will grow in any season in most tropical lands, thus giving farmers a three-crop year. To finance the fertilizer and insecticides needed to assure a

To finance the fertilizer and insecticides needed to assure a heavy yield, the Philippine gov-ernment has instituted an agri-cultural credit program which makes loans readily available to farmers. With the new rice, bankers in the countryside are assured of getting their money back. back.

This has changed the Philippines from being a rice impor-ting nation to an exporter," President Marcos said, and there President Marcos said, and there are statistics to back up his words. The rice yield in the Philippines, wherever IR 8 is grown, is five times greater than it was previously. Only last year, before the crops were in, the Philippines figured it would take 35,000 tons of rice from the United States to feed the population. With the first IR 8 harvest, however, the govern-ment realized the American rice would not be needed, and it was would not be needed, and it was sent on to be needed, and it was sent on to feed the hungry in another island nation, Indonesia. President Marcos is eager to share the Philippines' new wealth with the rest of the world. He

with the rest of the world. He has already sent the seed to the leaders of more than 60 other nations. At the coronation of the Sbah of Iran last year, gold gifts came from all over the world. The present from the Philippines looked poor by com-parison in its burlap sack, but it was far more valuable than any of the others. It was a bag of IR 8 seed. When the monsoons destroyed

When the monsoons destroyed the rice crop in South Viet-nam's costal plans last October, the Philippines rushed 45 tons of seed to the stricken area. This saved the farmers and the belea-guered country's economy. The results were so exciting that Vietnam is now changing over to IR 8.

President Marcos' pride is justified. "This is a more import-ant revolutions," he said, "than those being fought with guns." rified.

Hotel and . . .

hotel and restaurant operators to note and restaurant operators to send participants to that city for one week. He reiterated his pre-vious stand that separate semi-nars be held in each provincial capital so adequate participants from each province could be as-sured.

Destura added that in Sorso-gon alone there could be enough participants to warrant the hold-ing of such seminar in this capi-tal, --JDD

without their consent.

Agbayani said that the amend-ment is being introduced to protect teachers, as actually class-room teachers, can be presecuted by school officials by not allow-(Continued on page 7)

Reginning at San Fernando Poblacion this route would pass through Antipolo, Hubo, and terminate in Salingogon, situated on the Ragay Gulf. It traverses good rice, coconut and abaca land. MANILA, - (UPI) — It sounds as risky as turning a trained mice act o-ver a bunch of rats. But it worked and in the successful experiment may lie the germs of hope for a new and revital-ized Philippines where law, order and faith in elemental human dignity may yet prevail. The experiment is the Luneta Beau-

The experiment is the Euler's base tification Project — a dream come true for the man who originated it, Teodoro Valencia, columnist for the Manila Times, and Imelda Marcos, the Pres-ident's wife who can be as deter-minedly tough as she is pretty.

Philippine Gamble Pays Off

Dreams that Come True

Mrs. 1. Marcos Five years ago, Luneta Park and the old walled city of Intramutos lying off the Sea and Roxas Boule-vard were among the toughest areas in the world. It was literally worth your life to walk past the area after sundown. Squatters' shacks sat amidst squalor unequaled anywhere. Today, the area has been turned into one of the most beau-tiful park areas in Asia. The squatters have been resettled, and there is virtually no crime. Who accomplished the job, this near miracle in this still lawless city? Five-hundred ex-convicts. And they still are at work beautify-ing such areas as old Fort Santiago where Japanese tortured and murdered hundreds of Filipino, American, Chinese and other pri-soners before they set fire to it and fled at the end of World War 11.

Not one of the convicts have slid back into crime. And they see to it that the Manila hoodlum element does not operate in what they like to think of as "their area." The beautification project has been exact

what they has to think of as "their area." The beautification project has been carried out entirely through contributions, and it is obvious that the Filipinos take pride in the transformation. The area, once one of the dirtiest, is now litter-free. And it has touched off similar projects in other parts of the city.

Not far from the Escolta, the old financial district where law says men must wear jackets which they seldom do, an entire plaza was transformed overnight. Grass grows and fountains play in co-lored lights at night.

Beautification projects may seem a small point on which to bare hope for a nation which needs so much physically and moral-ly. But the Philippine leaders have been saying for years if a strong pride in nationhood could be aroused, the country could do (Continued on page 7)

Of Importance To Teachers

Rep. Aguedo F. Agbayani (N, Pangasinan), chairman of the House Committee on Education, said recently that the Committee has reported out for discussion on the floor of Congress, HB No, 17451 amending the Magna Carta for Public School Teachers. The bill, co-authored by Reps. Agbayani, Salih Ututalum (L, Sulu), Andres Clemente, Jr. (N, Masbate), and Constancio Maglana (N, Davao Oriental), seeks to

(N. Davao Oriental), seeks to provide additional protection for the "sthall fry" in the educa-tional system, particularly, class-room teachets.

Agbayani said that the measure actually introduces five amend-ments which were formulated ments which were formulated after consultations and thorough discussions with the Philippine Public School Teachers Associa-tion (PPSTA) and the Depart-ment of Education. Sectian 6 of the Magna Carta has been amended to permit a teacher to voluntarily transfer, unon his renuest even within

upon his request, even within three months before any local or three months before any local or national election, but teachers would continue to be protected from transfer within such period as they can not be transferred
