

SIX CLETRAC TRACTORS LINED UP IN FRONT OF THE MARSMAN TRADING CORP. MAIN OFFICE, BOSTON BLDG., PORT AREA, MANILA, READY FOR DEMONSTRATION

Considerable interest is being shown in CLETRAC Tractors by Philippine agriculturists, contractors and engineers. Six tractors arrived some time ago in Manila and are now being used for demonstration purposes. A large size CLETRAC is on display at the Marsman Trading store at 550 San Luis.

The CLETRAC is a general purpose tractor. For farming it is adaptable to plowing, planting, cultivating and harvesting. It offers speed and capacity for handling maximum acreage.

It has a clearance for cultivating all row crops, even tall corn.

The Model E CLETRAC is the only practical power for such jobs as getting out marketable logs, terracing, building ponds, digging trenches, grading, pulling and other incidental but important projects.

Mr. G. J. Curran, special representative of the Cleveland Tractor Co., is now in Manila to cooperate with tractor users in an advisory capacity. He may be reached through any of the Marsman Trading Corp. branches.
