Food Products

By C. G. HERDMAN
Director, Trading Division
Marsman & Company, Inc.

THE most important development recently in trading circles is the announcement that the Import Control Commission is to be reorganized, all three commissioners having presented their resignation. It is also rumored that in the forthcoming session of the Congress bills will be presented abolishing the import controls as at present administered and placing all such controls under the Central Bank which would limit imports by control of exchange.

The import control commissioners who are now resigning are to be complimented very highly on the task they have performed. Working under great difficulty with an inadequate budget and untrained personnel, they built up a very good organization which during the last few months has been working very efficiently. It is sincerely to be hoped that the new Commission will be allotted a greater budget, permitting it to employ additional trained personnel with adequate salary so that applications for import licenses can be processed expeditiously and efficiently.

One of the greatest difficulties experienced by importers in general for the past two years under the import

SMITH-CORONA

PORTARI F

One glance at the new SMITH-CORONA... and you're convinced that it's the most beautiful and sturdy portable typewriter you've ever laid eyes on!

Not just a "new model"...it's a revolutionary all new typewriter... with a total of nineteen new features plus fifteen SMITH-CORONA "exclusives"! Its smart, new Color-speed Keyboard is full standard office machine size... has rimless keys colored a restful non-glare green and "comfort shape" to cup your finger tips.

DEPENDABLE

IN WAR OR PEACE

"CATERPILLAR"

"Caterpillar" diesel engines, tractors, motor graders, and earthmoving equipment played a great role during the last war. Their outstanding records stem from a rugged simplicity of design that leaves little chance of things going wrong. During peace-time, they are equally dependable because back of them stands a factory of high reputation for high-quality products.

controls, has been the frequent changes in governing bodies and the personnel. It is to be hoped that the present reorganization will not result in another change of policy or in methods of processing.

THERE was very little change in conditions in the local market as regards foodstuffs during the month of December. Flour has arrived in ample quantity and there are even larger quantities to arrive during January. Stocks actually in the Philippines are more than enough to take care of nearby requirements, and with the flour arriving in January, should be ample to take care of all demands to the end of February at least.

Although stocks of flour in sight are sufficient for nearby months, it is very possible it may be difficult later to secure wheat flour in quantity until new-crop wheat becomes available, say next August or September. Reports are that the Canadian wheat crop suffered very considerable weather damage and that stocks of Canadian wheats suitable for milling high-grade bread-flours are very low. Sales of wheat and wheat flour under the I. W. A. in the United States have been extremely heavy. During the present crop year, that is, since August 1 up to the end of December, 83% of the total United States quota of export wheat and flour under I. W. A. has been exhausted. This leaves only 17% of the total quota still available to cover the 7 months to come before the beginning of another crop-year. It will not be at all surprising if this 17% is exhausted by the end of January, and all flour purchases subsequent to that date would be subject to availability of supplies and would be purchsed outside of I. W. A., which means that the cost would be approximately \$1.50 greater per 100 lbs. based on present quotations.

Canadian millers are hopeful that they will still be able to take care of extensive quantities of flour under I. W. A. up to the limit of their obligation, but the continued reports of the heavy Canadian wheat damage, apparently from reliable sources, have created considerable doubt regarding this point in the minds of flour importers.

On evaporated milk there are indications that over-stocks existing here for several months past are fast disappearing. Prices are firming up gradually and it appears probable that by the end of January importers will be able to sell their stocks of evaporated milk at cost or possibly with a slight profit instead of being forced to take a loss of P4 or P5 per case as during the last 4 months. They are still faced with heavy stocks of powdered milk. During December this situation was aggravated by the action of the Social Welfare Commission which had a surplus of powdered milk in drums and exchanged this with

various merchants for canned meats and other foodstuffs essential in its work. Unfortunately this exchange of goods was done on such a basis that merchants acquiring milk powder from the S. W. C. were able to sell to consumers at prices far below the cost of regularly imported milk and far below the cost of replacement from the United States, and this caused milk importers to take still further losses. It is understood that the S. W. C. discontinued this dumping of milk on the Manila market when it was advised of the effect of its action.

INFORMATION from California is that the sardine catch in the south during the month of December was extremely disappointing. The pack for the present season will be only a small fraction of the average. With the low stocks available, prices are steadily increasing. Supplies available will probably be exhausted early in the year. Stocks still on hand in the Philippines are far in excess of immediate requirements except in the 5-oz. pack, but it appears probable that during the second quarter of the year and until new-pack fish can be secured, which will not be before August, there will be an acute shortage of canned fish in the Philippines.

Stocks of canned meats, particularly of vienna sausage and potted meats, are more than ample. Canned fruits and vegetables, however, are far from sufficient to satisfy demand. There is very little probability of this condition improving at least until the second semester of the year. Fresh fruits and vegetables, both imported and locally

produced, are also in very short supply.

Textiles

By W. V. SAUSSOTTE General Manager Neuss, Hesslein Co., Inc.

THE new Import Control Commission, under the chairmanship of Ceferino de los Santos, assumed office on January 2. The other members are Augusto F. Espiritu, of the Central Bank, and Demetrio S. Santos, formerly Executive Officer of the preceding Commission whose chairman was Alfredo Montelibano. Demetrio Santos is temporarily occupying the position of Executive Officer in the new ICC.

It is the consensus that the former ICC Chairman Alfredo Montelibano and Francisco Ortigas, Jr. and Alfonso Calalang, members, discharged their administrative duties in a highly commendable manner. Chairman Ceferino de los Santos of the new ICC has stated that the new Commission will continue the good work of its predecessors.

On January 6 Chairman de los Santos announced that the Central Bank certified \$180,000,000 to be available for imports of controlled essentials and controlled non-
