

Making Four

by Vicente S. Maglalang

These four men will teach us more:
 This time ways of making four:
 2 and 2 are 4 you see;
 And 4 you get with 1 and 3.
 4 and 0 make only 4;
 Certainly could not be more.
 That is all there is to learn
 From these jolly little men.

$2 + 2 = 4$

$1 + 3 = 4$

$4 + 0 = 4$
