## Earnings of BOI-registered firms from exports last year totalled \$13.1M, well above the 1972 level

formance report.

Export of these items

reached a total of \$1.6 million in the three quarters of 1973, or

Cement topped all commodities in the non-traditional export list between January to September last year.

Exports reached a total of \$13.1 million or \$9.6 million more than what was exported during a comparable period in 1972.

Sales of textile yarns and fabrics also hit a record high last year. Board of Investmentsregistered textile firms recorded sales of \$11.0 million from January to Sentember last year.

This is \$8.6 million more than what was sold during a similar period in 1972, or a 374.34 per cent increase.

Sales of garments were also extraordinarily thigh last year. During the period, sales reached a total of \$12.1 million, \$6.0 million more than what was recorded in 1972 Last year saw the exports of the new Philippine-made items like electronic components, ceramics products, fish and seafood preparations, aluminum, laminated safety glass, pulp of straw and abaca and sugar confectioneries.

#### Going up

Electronic companies registered with the Board exported a total of \$2,4 million during the first three quarters last year. This is a \$1.8 million increase from the \$589,000 sales figure in 1972 or 310.02 per cent increase.

Exports of ceramics products also showed an upward movement last year. Ceramic-registered firms made a combined sales of \$2.7 million, \$1.6 million more than in 1972 or a 155.53 per cert increases Although laminated safety glass had limited export sales, it made its breakthrough in commercial sales. Exports reached a total of \$1.4 million, \$870,000 more than in 1972.

Sugar confectioneries higher by \$651,000 over

quarters of last year. This is \$38.8 million more than what was sold in  $197_2$  or a 105.26 per cent increase. While there was an

overall improvement in export sales, six major commodity groupings did not show sales improvements.

Due to raw materials problems, there were no tinplates exports last year. While a total of \$621,000 worth tinplates were exported in 1972. there was a zero

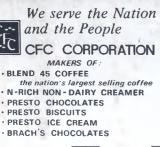

### We are a grateful company

We are a direct beneficiary of the government's program of encouragement and assistance to local enterprises exercised through the Board of Investments.

For this, we are truly grateful.

More power to the BOI! May it continue to succeed in its mission through the inspired leadership of men whose proven competence justifies our most optimistic expectations.

#### March 27, 1974

#### record in 1973.

Exports of soil pipes and fittings did not improve last year. First three quarter sales were only \$207,000 compared to a high of \$669,000 sales in 1972.

Sales of beer malt and liquor were also not encouraging in 1973. The Board data show sales only reached that \$770,000 compared to the 1972 sales of \$863,000 or a \$93,000 -deficit.

#### No improvement

Although firms like United Laboratories made a serious marketing campaign in Southeast Asia, sales of medicinal and pharmaceutical products did not im-

1972, Charcoal, an antipollution material, did not seem to sell very well as earlier projected. Sales only reached \$338,000 compared to \$377,000, in 1972.

Banana sales As in previous years, foreign exchange earnings from banana exports continued to grow.

Sales in the first three quarters reached a total of \$7.3 million or \$1.0

million more than that sold in 1972. The banana industry, compared to other sec-

Ince

Business Dav

tors, has been developing at a more rapid pace.

Its share in the Japanese market alone has grown from less than one per cent in 1968 to 32 per cent in 1972. In 1972, banana exports alone amounted to \$24.3 million and ranked eighth place among the Philippine top exports products. Area planted to bananas as of June 30, 1973, already reached 18 000 bectares.

Export firms As of December, 1973, there were a total of 176 firms registered with export capacities. Two segments, the textile yarns and the gar-

ments producers, consti-

tute a significant number

of these export firms.

There are over 27 gar ment companies registered with the Board and some 24 textile yarns producers.

In 1972, the Board initiated a rationalization scheme for both the textile and the garments industry. During the first semester of 1973, exports of textile yarns, fabrics and garments totalled \$13.5 million, three times the 1972

figure of \$4.3 million.

Firms registered under the Export Incentives Act as of June 30, 1973 employ a total of 35,113 individuals and pay salaries amounting to P68 million per year. The chemical industries provide the largest number of employment with 15,997 followed by agro-industries (8,036) and mining and mineral processing industries (6,579).

Growth springs from our natural wealth. The bountiful resources tapped from the earth. Transformed into usable raw materials to power our industries. Booming industries for a stronger economy to serve a growing nation. Such is the chain that will bind us to economic prosperity. And MARIA CRISTINA CHEMICAL INDUSTRIES is the initial link. Efficiently providing basic processed products which are the building blocks of our industries.
